Course Overview

CPQ Administrators can use this course to gain proficiency in core functions needed to implement Commerce functionality on their CPQ site. Key topics covered in this course include implementing an introduction to the Commerce process in CPQ, working with Commerce attributes, using the Commerce Layout Editor to create transaction layouts, using Commerce actions, understanding Commerce process steps, participant profiles, and step transitions, using Commerce rules, using Commerce formulas, and modifying Commerce attribute values.

What You Will Learn

Module 1: Commerce Actions Essentials

- Objectives
- Commerce Actions Overview
- Types of Commerce Actions
- Commerce Action Use Case
- Adding Actions
- Commerce Action Editor Tabs
- General Tab
- Modify Tab
- Destination Tab
- Integration Tab
- Document Views Tab
- Performance Tab
- Summary

Module 2: Commerce Attributes Essentials

- Objectives
- Commerce Attribute Data Types
- Reference Application Preconfigured Attributes
- Adding Commerce Attributes

- Commerce Attribute Editor Tabs
- General Tab
- Default Tab
- Modify Tab
- Document Views Tab
- Mapping Tab
- Summary

Module 3: Commerce Complex Attributes

- Objectives
- HTML Attribute
- Common Applications
- Defining HTML Content (Simple & BML-Generated)
- HTML Considerations
- File Attachment Attributes
- Properties & Limitations
- Currency Attributes
- Stored & Displayed Precision
- Hover Tooltip
- Rounding Considerations
- RTE Templates for JET Transaction UI
- Basic Functions
- Creating, Inserting, Renaming, Deleting Templates
- Summary

Module 4: Commerce Complex Formulas

- Objectives
- What Is a Function?
- Nested Functions
- Math Functions & Editor
- Boolean & String Functions
- Formulas with Conditionals
- Defining Conditions
- Nested Conditionals
- Query Function
- Details Editor, Conditions, Return Values
- Summary

Module 5: Commerce Constraint Rules

- Objectives
- Constraint Rule Use Case
- Accessing Commerce Rules
- Rule Editor Window & Properties
- Constraint Rule Use Case Results

- Summary

Module 6: Commerce Process Essentials

- Objectives
- Commerce in the CPQ Process
- Commerce & Commerce Process Definition
- Major Components & Order of Operations
- Process Actions
- Oracle Quote to Order Manager
- Transaction Layout
- Commerce Rules & Actions
- Approval Process
- Steps & Participant Profiles
- Administration Navigation & Quick Links
- Summary

Module 7: Commerce Formulas Essentials

- Objectives
- Formula Management & Use Case
- Formula Management Basics
- System and Version Attributes
- Building a Basic Formula
- Formula Input Options
- Adding a Formula to an Action
- Formula Elements & Operators
- Summary

Module 8: Commerce Hiding Rules

- Objectives
- Hiding Rule Use Case
- Accessing Commerce Rules
- Rule Editor Window & Features
- Use Case Results
- Summary

Module 9: Commerce Layout Editor

- Objectives
- What is the Commerce Layout Editor?
- Accessing the Editor
- Panels, Tabs, Columns, Column Settings
- Spacers and Toolbars
- Line Item Grid & Column Management
- Deploying Commerce: Quick Links & Deployment Center
- Summary

Module 10: Commerce Line Item Filtering Rules

- Objectives
- Line Item Filtering Rule Use Case
- Accessing Commerce Rules & Rule Editor
- Enabling New Filter Rules
- Use Case Results
- Summary

Module 11: Modifying Attribute Values

- Objectives
- Action Modify Tab Overview
- Run Validation Before Modify
- Advanced Modify Basics
- Transactions, Line Items, Document Numbers
- Advanced Modify Return Format & Timeout
- Looping Over Line Items & Using Formulas
- Summary

Module 12: Process Action & Invocation

- Objectives
- Process Actions & Types
- Process Invocation & Page List
- Creating Invocation Actions & Rules
- User Access Rights
- Summary

Module 13: Commerce Rules Essentials

- Objectives
- Types of Commerce Rules
- Accessing Rules & Rule Editor
- Related Rules: Attributes & Actions
- Summary

Module 14: Transaction & Transaction Line Defaults

- Objectives
- BML and Formulas Together
- New Transactions & Attribute Default Tab
- Main Document & Line Advanced Defaults
- Run Once For All Line Items
- Summary

Module 15: Commerce Validation Rules

- Objectives
- Validation Rule Use Case
- Accessing Rules & Rule Editor Window
- Features & Use Case Results
- Summary

Module 16: Importing & Exporting Line Items

- Objectives
- Exporting Line Items
- Full & Filtered Exports
- Export Action Configuration
- Importing Line Items
- Summary

Module 17: Steps & Participant Profiles

- Objectives
- Steps and Transition Rules
- Participant Profile Views & Best Practices
- Accessing & Decommissioning Steps
- Profile Management
- Summary

Module 18: Transition & Auto-Forwarding Rules

- Objectives
- Transition Rules & Notifications
- Auto-Forwarding Rules & Types
- Adding Rules & Conditions
- Auto-Forwarding Example
- Summary

Module 19: Troubleshooting Commerce Rules

- Objectives
- Troubleshooting Strategy
- Debugging with Favorite IDs
- Pipeline Viewer
- Transaction ID Tracking
- Summary
